

TESTIMONIAL  
SMALLVILLE RIDGE BODY CORPORATE  
  
FOR  
  
SMART WATER USE

We are a complex of 105 Units.

We had Water Meters installed by SMART WATER USE in April 2017.

The installation went off smoothly and the property was left in the condition in which it was found.

Before Water Meters we were averaging 1468 kilolitres per month.

By the end of 2017 we were averaging 1197 kilolitres per month

By the end of 2018 we were averaging 1003 kilolitres per month.

As can be seen from above, when residents started paying for their own water, the usage dropped.

Our Water Meters are monitored and we are made aware of water leaks by an alarm system through SMART WATER USE.

Our Water Meters are serviced by SMART WATER and to date their service has been efficient in helping us to conserve water and fix leaks.

SMART WATER has been available to us and assisted us in a professional and courteous manner. We would highly recommend SMART WATER and their team.

Signed this 9<sup>th</sup> day of May 2019
